Copy Grid Link

Leave Grid

Controls Key

Clicking on a cell in the grid will focus onto that cell, allowing you to type.

Typing when clicked into the grid will fill the focused cell with the typed character and move across the grid in the specified typing direction. (Default direction is right)

Backspace deletes the current cell value and moves to the left. If "Delete Direction Linked To Type Direction" is true, it will move opposite the typing direction instead.

Controls
Height: 10   Cell Size: 40
Width: 10
